Subject index of volume 121

Activation: Ageing; T-cell; CD4; CD8; Cytomegalovirus **121, 187**

Activation: Chemokines; Ageing; T lymphocytes; Monocytes **121, 89**

Aged: Cytokines; Lymphocyte; Interferon type II; ELISA; Bioassay **121, 47**

Ageing: Apoptosis; T cell **121, 151**

Ageing: Chemokines; T lymphocytes; Monocytes; Activation **121, 89**

Ageing: Glutathione; Antioxidant; Inflammatory response; Flavonoids **121, 217**

Ageing: Ku protein; DNA repair **121, 5**

Ageing: Linker histone variant H1 α ; Human diploid fibroblasts; Cell cycle **121, 101**

Ageing: Apoptosis; Centenarians; Oxidative stress; 2-Deoxy-D-ribose; Longevity **121, 239**

Ageing: Dendritic cells; Review **121, 123**

Ageing: Microsatellite instability (MSI); Mismatch repair (MMR) **121, 173**

Ageing: T-cell; CD4; CD8; Cytomegalovirus; Activation **121, 187**

Antinuclear antibodies: Chemokines; Cytokine network; Proinflammatory cytokines; Rheumatoid factor; Soluble receptors **121, 37**

Antioxidant: Glutathione; Inflammatory response; Ageing; Flavonoids **121, 217**

Apoptosis: Ageing; T cell **121, 151**

Apoptosis: Centenarians; Ageing; Oxidative stress; 2-Deoxy-D-ribose; Longevity **121, 239**

Apoptosis memory: Telomeres; Replicative senescence **121, 69**

Bioassay: Cytokines; Aged; Lymphocyte; Interferon type II; ELISA **121, 47**

Carnosine: DNA damage; Human CD4 + T cell clones; Lifespan **121, 203**

CD8: Ageing; T-cell; CD4; Cytomegalovirus; Activation **121, 187**

CD4: Ageing; T-cell; CD8; Cytomegalovirus; Activation **121, 187**

CD69: Elderly; $\gamma\delta$ cell; Immunosenescence; LPS **121, 231**

$\gamma\delta$ cell: CD69; Elderly; Immunosenescence; LPS **121, 231**

Cell cycle: Linker histone variant H1 α ; Human diploid fibroblasts; Ageing **121, 101**

Centenarians: Apoptosis; Ageing; Oxidative stress; 2-Deoxy-D-ribose; Longevity **121, 239**

Centenarians: Dementia; Homocysteine; Vitamin B12; Folate; Vitamin B6; Nutrition **121, 251**

Chemokines: Ageing; T lymphocytes; Monocytes; Activation **121, 89**

Chemokines: Cytokine network; Proinflammatory cytokines; Antinuclear antibodies; Rheumatoid factor; Soluble receptors **121, 37**

Costimulation: Telomerase; Replicative senescence; T cell clones; Telomere length **121, 181**

- Cytokine network:** Chemokines; Proinflammatory cytokines; Antinuclear antibodies; Rheumatoid factor; Soluble receptors **121, 37**
- Cytokines:** Aged; Lymphocyte; Interferon type II; ELISA; Bioassay **121, 47**
- Cytomegalovirus:** Aging; T-cell; CD4; CD8; Activation **121, 187**
- Dementia:** Homocysteine; Vitamin B12; Folate; Vitamin B6; Nutrition; Centenarians **121, 251**
- Dendritic cells:** Aging; Review **121, 123**
- 2-Deoxy-D-ribose:** Apoptosis; Centenarians; Aging; Oxidative stress; Longevity **121, 239**
- DNA damage:** Carnosine; Human CD4 + T cell clones; Lifespan **121, 203**
- DNA repair:** Ku protein; Ageing **121, 5**
- Elderly:** CD69; $\gamma\delta$ cell; Immunosenescence; LPS **121, 231**
- Elderly:** IFN- γ ; Endotoxin; Influenza **121, 131**
- ELISA:** Cytokines; Aged; Lymphocyte; Interferon type II; Bioassay **121, 47**
- Endotoxin:** IFN- γ ; Influenza; Elderly **121, 131**
- Flavonoids:** Glutathione; Antioxidant; Inflammatory response; Ageing **121, 217**
- Folate:** Dementia; Homocysteine; Vitamin B12; Vitamin B6; Nutrition; Centenarians **121, 251**
- Glutathione:** Antioxidant; Inflammatory response; Ageing; Flavonoids **121, 217**
- Homocysteine:** Dementia; Vitamin B12; Folate; Vitamin B6; Nutrition; Centenarians **121, 251**
- Human CD4 + T cell clones:** Carnosine; DNA damage; Lifespan **121, 203**
- Human diploid fibroblasts:** Linker histone variant H1o; Cell cycle; Ageing **121, 101**
- Human:** Viruses; Long-term **121, 161**
- IFN- γ :** Endotoxin; Influenza; Elderly **121, 131**
- Immunosenescence:** CD69; Elderly; $\gamma\delta$ cell; LPS **121, 231**
- Immunosenescence:** NK; NKT; Memory cells **121, 77**
- Immunosenescence:** Zinc; Infections **121, 21**
- Infections:** Zinc; Immunosenescence **121, 21**
- Inflammatory response:** Glutathione; Antioxidant; Ageing; Flavonoids **121, 217**
- Influenza:** IFN- γ ; Endotoxin; Elderly **121, 131**
- Interferon type II:** Cytokines; Aged; Lymphocyte; ELISA; Bioassay **121, 47**
- Ku protein:** DNA repair; Ageing **121, 5**
- Large T antigen:** TAT; SV40; Protein transduction; Recombinant; Proliferation **121, 113**
- Lifespan:** Carnosine; DNA damage; Human CD4 + T cell clones **121, 203**
- Linker histone variant H1o:** Human diploid fibroblasts; Cell cycle; Ageing **121, 101**
- Longevity:** Apoptosis; Centenarians; Aging; Oxidative stress; 2-Deoxy-D-ribose **121, 239**
- Long-term:** Human; Viruses **121, 161**
- LPS:** CD69; Elderly; $\gamma\delta$ cell; Immunosenescence **121, 231**
- Lymphocyte:** Cytokines; Aged; Interferon type II; ELISA; Bioassay **121, 47**
- Memory cells:** Immunosenescence; NK; NKT **121, 77**
- Microsatellite instability (MSI):** Aging; Mismatch repair (MMR) **121, 173**
- Mismatch repair (MMR):** Aging; Microsatellite instability (MSI) **121, 173**
- Monocytes:** Chemokines; Ageing; T lymphocytes; Activation **121, 89**
- NK:** Immunosenescence; NKT; Memory cells **121, 77**

- NKT**; Immunosenescence; **NK**; Memory cells **121**, 77
- Nutrition**; Dementia; Homocysteine; Vitamin B12; Folate; Vitamin B6; Centenarians **121**, 251
- Oxidative stress**; Apoptosis; Centenarians; Aging; 2-Deoxy-D-ribose; Longevity **121**, 239
- PCR**; sjTREC; Thymic output **121**, 59
- Proinflammatory cytokines**; Chemokines; Cytokine network; Antinuclear antibodies; Rheumatoid factor; Soluble receptors **121**, 37
- Proliferation**; TAT; SV40; Large T antigen; Protein transduction; Recombinant **121**, 113
- Protein transduction**; TAT; SV40; Large T antigen; Recombinant; Proliferation **121**, 113
- Recombinant**; TAT; SV40; Large T antigen; Protein transduction; Proliferation **121**, 113
- Replicative senescence**; Telomerase; T cell clones; Costimulation; Telomere length **121**, 181
- Replicative senescence**; Telomeres; Apoptosis memory **121**, 69
- ReqQ helicase**; Werner's syndrome; T lymphocytes **121**, 139
- Review**; Dendritic cells; Aging **121**, 123
- Rheumatoid factor**; Chemokines; Cytokine network; Proinflammatory cytokines; Antinuclear antibodies; Soluble receptors **121**, 37
- sjTREC**; Thymic output; PCR **121**, 59
- Soluble receptors**; Chemokines; Cytokine network; Proinflammatory cytokines; Antinuclear antibodies; Rheumatoid factor **121**, 37
- SV40**; TAT; Large T antigen; Protein transduction; Recombinant; Proliferation **121**, 113
- TAT**; SV40; Large T antigen; Protein transduction; Recombinant; Proliferation **121**, 113
- T-cell**; Aging; CD4; CD8; Cytomegalovirus; Activation **121**, 187
- T cell**; Apoptosis; Ageing **121**, 151
- T cell clones**; Telomerase; Replicative senescence; Costimulation; Telomere length **121**, 181
- Telomerase**; Replicative senescence; T cell clones; Costimulation; Telomere length **121**, 181
- Telomere length**; Telomerase; Replicative senescence; T cell clones; Costimulation **121**, 181
- Telomeres**; Apoptosis memory; Replicative senescence **121**, 69
- Thymic output**; sjTREC; PCR **121**, 59
- T lymphocytes**; Chemokines; Ageing; Monocytes; Activation **121**, 89
- T lymphocytes**; Werner's syndrome; *ReqQ* helicase **121**, 139
- Viruses**; Human; Long-term **121**, 161
- Vitamin B12**; Dementia; Homocysteine; Folate; Vitamin B6; Nutrition; Centenarians **121**, 251
- Vitamin B6**; Dementia; Homocysteine; Vitamin B12; Folate; Nutrition; Centenarians **121**, 251
- Werner's syndrome**; T lymphocytes; *ReqQ* helicase **121**, 139
- Zinc**; Infections; Immunosenescence **121**, 21
